

VNI West – October Information Sessions

The VNI West project is a major infrastructure project to build a vital new transmission line between Victoria and New South Wales.

It will harness clean, low-cost electricity from renewable energy zones (REZs) in both states and improve the reliability and security of our electricity supply as ageing coal-fired power stations retire.

Come along to one of our events to hear more about the project, including the draft corridor and ask questions of the project team.

Each event will include a town hall presentation and panel Q&A from **5:00pm – 6:30pm** followed by a drop-in information session from **6:30pm – 7:30pm**.

Tuesday 10 October

Wednesday 11 October

Thursday 12 October

Monday 16 October

Tuesday 17 October

Thursday 19 October

Charlton Park Complex, Charlton

Stewart and McDonald Hall, St Arnaud

Boort Memorial Hall, Boort
